¹ Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.

² Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services, except government.

Note.—Value added is the contribution of each private industry and of government to gross domestic product. Value added is equal to an industry's gross output minus its intermediate inputs. Current-dollar value added is calculated as the sum of distributions by an industry to its labor and capital which are derived from the components of gross domestic income.

Note (cont'd.).—Value added industry data shown in Tables B-12 and B-13 are based on the 1997 North American Industry Classification System (NAICS). GDP by industry data based on the Standard Industrial Classification (SIC) have been updated in line with the national income and product accounts (NIPA) benchmark revisions released in December 2003. Revised SIC-based estimates are available from the Department of Commerce, Bureau of Economic Analysis, for current-dollar value added by industry for 1947–97 and for real value added for 1977–97.

For further details, see *Survey of Current Business*, November 2004.
